

EFFECTOR

An End to end Interoperability Framework For Maritime Situational Awareness at Strategic and Tactical Operations

UNLOCKING THE FULL CAPABILITIES OF MARITIME SURVEILLANCE

www.effector-project.eu

The **EFFECTOR project** offers a solution for maritime surveillance and border security which includes:

- > an **interoperability framework**; and
- > associated **data fusion** and **analytics** services.

In brief, EFFECTOR improves the decision support process by enabling faster detection of new maritime events. At the same time EFFECTOR assists the operating authorities and on-site intervention forces in communicating and sharing information within a common environment, the Common Information Sharing Environment (CISE).

The EFFECTOR system is tested, validated and demonstrated in real operational scenarios together with maritime authorities, End Users and practitioners in France, Portugal and Greece.
